WIND SOLUTIONS

ROPE ACCESS NOORD
VERTICAL SAFETY, ACCESS & RESCUE

Wind Solutions is a multidisciplinary Dutch company specialized in performing technical work at heights, in depths, in confined spaces and at other difficult to reach places. Our work encompasses a wide range of activities, including inspection, maintenance and repair on off- and onshore installations like wind turbines, offshore substations, platforms, jacket foundations and on large (lifting) vessels. We offer experienced teams of technical specialists who adhere to stringent safety standards, ensuring the highest level of safety in their expertise.

We provide **safe access** and exceptional **technical expertise**. Moreover, we are capable of serving as stand-by for rescue operations and medical emergencies, simultaneously delivering our rope access services.
